# **FINAL PROJECT**

## **WEB – DESIGNING**

### **MOTIVATION STATEMENT:**

A portfolio published on the web humanizes you as a master of the craft. People come to you not only for you being an outstanding web designer, marketer or copywriter, but because they like you. You know, it's a good psychological trick, and designing a personal portfolio web is cool and easier task near me. Customers are more likely to choose those, who seem to be more decent, "likable", friendly-looking than others. Whereas hard skills are often considered afterward. That's why I preferred to design a personal portfolio website. When I have an intro about my work and skills as a portfolio website then people get to know me and they can contact me for their business solutions if they become satisfied with my services.

I just say that before designing a great business idea or any other big idea website, we should design a personal portfolio to become familiar with the techniques and ideas of works.

### **SHORT DESCRIPTION:**

- A portfolio website presents your professionalism and dedication to the craft better and more clearly than any CV. You don't just tell; you show actual cases and examples which speak volumes. Moreover, owing to the portfolio website, you can show your mature and sophisticated approach to selling your work along with yourself.
- Your portfolio is the only web-space where everything is up to you. You are able to create a never-seen-before platform with unique content and

achieve a recognizable identity the way you imagine it. A private portfolio website lets your inner creator go far beyond any cliché.

- An online portfolio is certain to make you available and searchable for new clients. It lets your potential employers find you the moment they get round to using a search engine or looking through candidates' applications.

## WHAT MY PORTFOLIO INCLUDES:

I have designed the personal portfolio myself and individually and I have added the following pages in my web:

- **Home page** (having my short intro and all links for other pages)
- **About page**
- **My services page**
- **My skills page**
- **Contact me page**

## TOOLS:

Following tools were used for designing my portfolio:

- **HTML 5** used for structuring and constructing the content.
- **CSS** used for styling and designing of the portfolio.
- **VS CODE** used as a coding platform for development.
- **ADOBE PHOTOSHOP** for the designing of pages and backgrounds and logos.
- **W3 SCHOOLS** for the concepts and guidance.

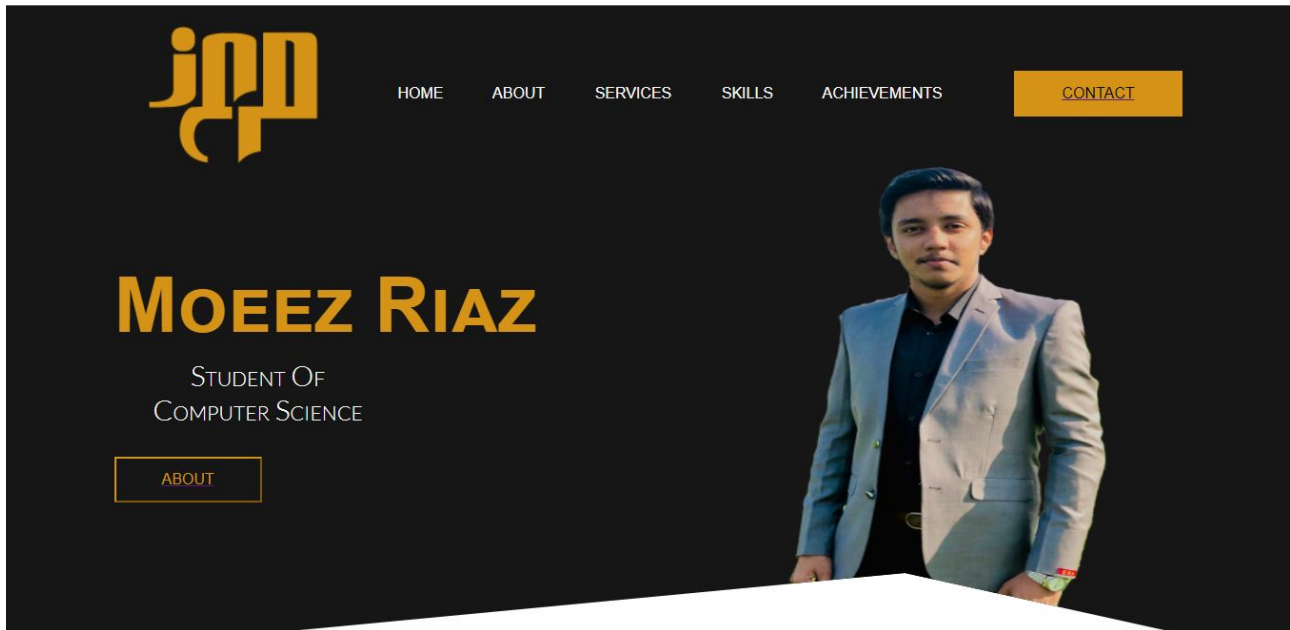

## TESTING:

After the project had designed and developed, it was tested and then the changes that were needed during testing were made.

## IMPLEMENTATION AND MAINTENANCE:

After required changes made, the project was finally implemented and was maintained by linking and filling anchor tags.

# PORTFOLIO SCREEN SHOTS

## About Me

HELLO! I AM MOEEZ AHMAD

I was born on December 23, 2001, in Lahore. I have studied Intermediate in Computer Science from Kips College, Lahore. Currently, I am Doing BS in Computer Science from FAST-NUCES, Faisalabad Campus. Also, I am working as Graphics Designer, Digital Marketing Manager, Front-End web designer, Social Media Manager and Search Engine Optimizer at Image works Studio. I am a Freelancer and Front-end web designer. I can make you beautiful social designs, marketing designs and also can manage your marketing optimization. I also provide the facility of digital marketing to my clients. I can also make you beautiful marketing and portfolio responsive websites. You can follow me on

# PORTFOLIO SCREEN SHOTS

## My Services

I provide the following services for your bussiness solutions

### Graphics Designing

Good design's not about what medium you are are working in. It's about thinking hard about what you want to do and what you have to work with before you start

### HTML & CSS

A successful website does three things: It attracts the right kinds of visitors. Guides them to the main services or product you offer. Collect Contact details for future ongoing relation.

### Digital Marketing

No matter the product or service you provide, there is a great chance that it's a commodity, or at the least, you have many comparable competitors.

### Web Designing

The public is more familiar with bad design than good design. It is, in effect, conditioned to prefer bad design, because that is what it lives with. The new becomes threatening, the old reassuring.

### Search Engine Optimization

SEO is an asset. It's like buying real estate and investing to remodel your kitchen and bath. That work will increase the value of your home so that you can sell it in the future for a profit. Using SEO tricks or hacks is like trying to beat the house in Vegas.

### Web Development

Any fool can write code that a computer can understand. Good programmers write code that humans can understand. So first solve the problem then, write the code

## My Experience

I have an Experience of 3+ years in my passion
